BIRD ILT

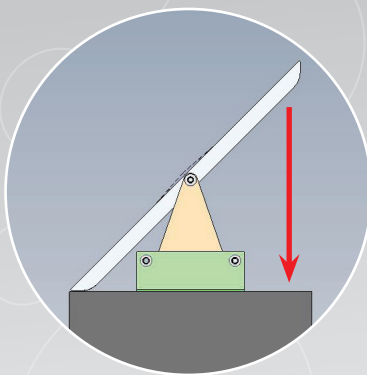

Patent Pending

Bird Tilt deters all birds from Starlings to Bald Eagles.

Bird Tilt provides a false perch.

When a bird attempts to land on Bird Tilt's platform, its weight (as little as 20 grams) causes the platform to pivot, and the bird slides off unharmed.

FEATURES

- Various sizes available, depending on surfaces needing protection
- Can be weighted on one side to maintain the same position unless activated
- Permanent or removable system
- Optional nest guard

AVAILABLE IN FOUR MATERIALS

PLASTIC » (all-weather) for utility cross arms and non-conductive requirements

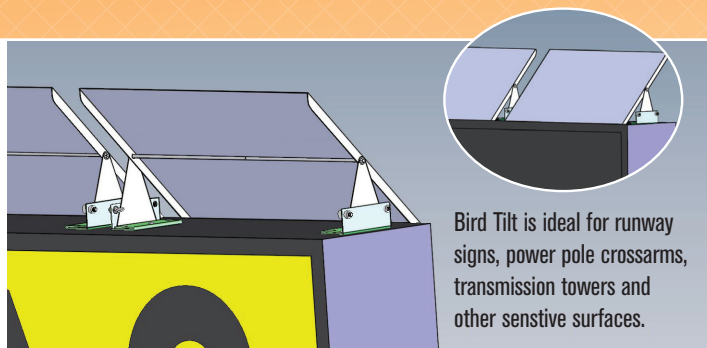

ALUMINUM » for airfield runway mandatory and directional signs and other equipment

GALVANIZED » for utility transmission towers and steel equipment

STAINLESS STEEL » for marine facilities, offshore locations and sea faring vessels

866-247-3693
