

BirdSpring™ by Birdzoff

A No-Perch System For

- Gulls
- Vultures
- Osprey
- Hawks
- Eagles
- Marine Birds

Protect Long Stretches – In Line

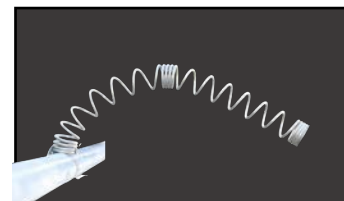

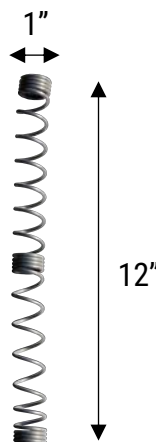

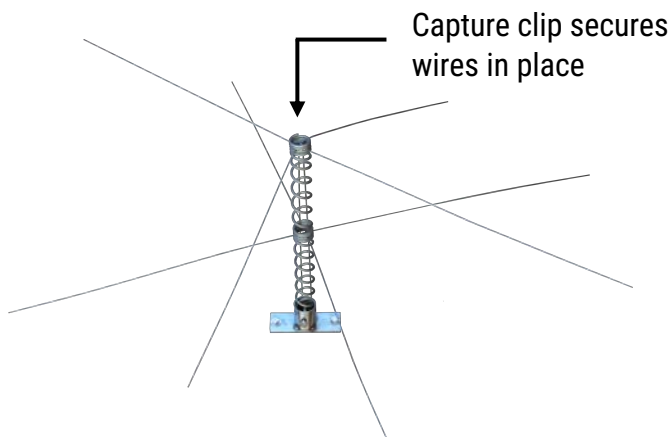

Patent Pending

Three-tiered Deterrent

- 1st – Visual barrier alerts birds to undesirable perch
- 2nd – If activated by bird contact, springs and wires bounce and sway, scaring the bird away
- 3rd – Other birds identify the moving system as an unstable perch and choose to go elsewhere

Protect One Area – Freestanding

Flexible in case of falls

[See BirdSpring in Action](#)

A jiggly, wiggly, wobbly perch deterrent
